## Technical Skills

**Technical Skills**: Java (Core, Java 8), JDBC, JSP, Servlets, Spring Boot, Spring Security, Hibernate, JUnits, MySQL, Postman, HTML, CSS, JavaScript, Bootstrap, Tailwind css, React, AWS (EC2, S3, RDS), Docker.

CS Fundamentals: Data Structures & Algorithms (Intermediate), OOPS, Computer Network, Operating System.

## EXPERIENCE

# Full Stack Java Developer Intern

Sep. 2024 - Oct. 2024

NoviTech Research and Development

Coimbatore. Tamil Nadu

- Developed **QPAY**, a full-stack online banking application using Java, Stream API, JSP, Servlets, JDBC, MySQL, and Collections, implementing end-to-end features such as user authentication, account management, transactions, and complete CRUD operations.
- Applied OOPS concepts, SOLID principles, and the DAO design pattern to structured, and reusable code, making the application easier to extend, debug, and integrate across the frontend and database layers.

#### Projects

Parking Lot System Java, JSP, JDBC, MySQL, Collections, Stream API, LLD

View

- Built a full-stack **Parking Lot System** with JSP, Servlets, JDBC, and MySQL enabling vehicle entry/exit, dynamic slot allocation, ticketing, and admin controls for floor/slot management.
- Applied OOPS, SOLID principles, and MVC/Adapter patterns; leveraged Collections and Stream API for efficient slot allocation and maintainable code design.
- Tested critical scenarios (e.g., payment failures, lost tickets, slot mismatches) and prepared the system for future enhancements like multi-gateway payments and real-time monitoring.

Mobile Prepaid Recharge Application Spring Boot, JPA, MySQL, Stream API, LLD, JSP

View

- Developed a full-stack Mobile Prepaid Recharge Platform supporting user registration, authentication, mobile number validation, plan browsing, secure payments, and recharge scheduling.
- Implemented **OOP design, SOLID principles**, and **DAO patterns** with Spring Boot and Hibernate; optimized logic using Collections & Stream API for scalability and maintainability.
- Integrated **payment gateway support** (Razorpay), transaction history, and admin portal features for plan management, reports, and user controls; containerized deployment with **Docker**.

#### Certificates

## Full Stack Developer Certification Novi Tech R&D

View

Learned frontend, backend, and database technologies including HTML, CSS, JavaScript, React, Java, and MySQL.

## AWS Cloud Computing Certification Quazio

View

Gained practical knowledge of AWS services like S3, RDS, and EC2 through hands-on training.

## ACHIEVEMENTS & LEADERSHIP

Academic Excellence: Secured 1st Rank in School in Grades 11 & 12; consistently served as Class Leader (Grades 1–12) and elected as School Pupil Leader in Grade 12.

Executive Roles: Executive Member at Scientel Association, Top Performer in Synergy Squad 3.0, and active contributor at the Mobile & Web Development Club.

Problem-Solving Milestones: Solved 1000+ coding problems across platforms including LeetCode & GeeksforGeeks; achieved a 200 Days of Code streak on LeetCode with 400+ DSA problems.

GitHub & Competitive Programming: Maintaining a 1.5+ year GitHub streak and a 1-year LeetCode streak, showcasing consistent coding practice & project contributions.

Project Development: Built 25+ application logics, 10+ full-stack projects, and 20+ console-based applications using Spring Boot, MySQL, Postman, and REST APIs, applying industry-standard practices.

LinkedIn Learning Challenge: Successfully completed 100 Days of Full Stack Java Development, gaining hands-on expertise in backend development and API implementation.
