PROJECTS

E-Mart | jdbc,H2 database,spring,React.js
GitHub Repository: View on GitHub   Live Demo: Watch on YouTube

Key Contributions: Enabled users to browse and search for electronics, view detailed product information, and add items to their cart.Built a robust backend system to manage orders, user data, and inventory securely in real-time.

LT - online Gym | Html5,css,Java script,bootstrap
GitHub Repository: View on GitHub   Live Demo: Watch on YouTube   Website: Explore Online Gym

Key Contributions: Users can access the LT chatbot 24/7 for fitness guidance and personalized support. The platform provides trainer details and offers a free workout and diet chart for users to follow.

FoodApp | jdbc,jsp.j2ee,mysql,servlet
GitHub Repository: View on GitHub Live Demo: Watch on YouTube

Key Contributions: Enabled users to browse restaurants, explore menus, and add items to their cart before proceeding to payment. Implemented secure user authentication and tracking of past orders, along with a dynamic admin dashboard for efficient management.

Agro Connect | Html5,css,Boostrap,Jdbc,jsp,Mysql
GitHub Repository: View on GitHub   Live Demo: Watch on YouTube   Host Link: Visit the Live Project

Key Contributions: Agro Connect helps rural farmers connect with industry professionals to create job opportunities. It also offers an online marketplace where users can buy fresh vegetables directly from farmers.

INTENSHIP

Web Developer

Prodigy Company | During intern I created a portfolio, calculator app, and weather app to showcase my skills.

Java Developer

Interpe Company | During intern I coded a Tic Tac Toe game and a bank system ,to handle database.
